Title: Develop a task manager application using AngularJS for the frontend and MongoDB for the backend

      i.   **Creating databse**

```
test> use try
switched to db try
```

      ii.   **Create collection**

```
try> db.createCollection("prac12")
{ ok: 1 }
```

      iii.   **Insert the data into the collection**

```
try> db.prac12.insertMany([{ task: "Assignment1", description: "complete unit 1", status: "pending" }, { task: "Assignme
nt2", description: "complete unit 2", status: "pending" }, { task: "Assignment3", description: "complete unit 3", status
: "pending" }, { task: "Assignment4", description: "complete unit 4", status: "pending" }])
{
  acknowledged: true,
  insertedIds: {
    '0': ObjectId('66e129616eb6dce6002710bc'),
    '1': ObjectId('66e129616eb6dce6002710bd'),
    '2': ObjectId('66e129616eb6dce6002710be'),
    '3': ObjectId('66e129616eb6dce6002710bf')
  }
}
```

4. **Open visual studio code ❼open your folder❼create a files**

      i.   **Server.js**

      ii.   **Index.html**
